INEXTVIR

Autumn-Spring Seminar series

Date	Time (CET)	Name	Organisation	Title	Type of activity
12/11/20	13:00	Murilo Zerbini	Universidade Federal de Vicosa, Brazil	*Contagium vivum fluidum*: virus taxonomy from the origins of virology until the 21st century	Lecture
26/11/20	13:00	Ed Rybicki	University of Cape Town, South Africa	Maximising the role of plants and plant viruses in making vaccines / pharmaceuticals	Lecture
07/01/21	09:00	Adrian Gibbs	Australian National University, Emeritus, Australia	Phylogenetics and dating; a simple (or simplistic?) view.	Lecture
21/01/21	09:00	Roger Jones	University of Western Australia	Epidemiology and control of plant virus diseases (title TBC)	Lecture
04/02/21	09:00	David Cook	Department of Primary Industries and Regional Development, Australia	Economics of plant health (title TBC)	Lecture
18/02/21	13:00	Francis Wamonje	International Centre of Insect Physiology and Ecology, Kenya	High Throughput Sequencing (HTS) for discovery of beneficial viruses in African cropping systems	Lecture
04/03/21	13:00	Titus Alicai	National Agricultural Research Organisation (NARO), Uganda	Cassava viruses (title TBC)	Lecture
18/03/21	13:00	Sebastien Massart	University of Liege, Belgium	The poor relative of high throughput sequencing in research: a focus on controls and contamination analysis	
01/04/21	17:00	Kerry Mauck	University of California, Riverside, USA	TBC	Lecture
April - TBC	TBC	Jan Kreuze	International Potato Center, Peru	Bioinformatics training session integrated with https://www.cabana.online/index	2 days training for 1.30
15/04/21	TBC				
29/04/21	TBC				

Inextvir is funded under by the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No. 813542
